

Player Audio/Video Devices

The NJSIAA has recently become aware of players wearing audio and video devices during play. No player may wear any audio device (such as a microphone) or video device (such as a camera) during a contest. This restriction also applies to all pre-game and post-game activities. Bench personnel who are not actively involved in play are also prohibited from using these devices unless they are specifically responsible for filming the game for the team. This rule applies to all NJSIAA sports.
